Conference Programme xi

Does representative wind information exist?
J. Wieringa (Wageningen, The Netherlands) 1
Directional analysis of extreme wind speeds in Poland
J.A. Żurański, B. Jaśpińska (Warsaw, Poland) 13
A refined model for calculating 3-D equivalent static wind forces on structures
G. Piccardo, G. Solari (Genova, Italy) 21
Coherence of wind-induced pressures on buildings in urban areas: Set up of a full-scale experiment
C.P.W. Geurts, H.S. Rutten, J.A. Wisse (Eindhoven, The Netherlands) 31
Dynamic behaviour of guys under turbulent wind load
U. Peil, H. Nölle (Braunschweig, Germany), Z.H. Wang (Karlsruhe, Germany) 43
Full-scale measurements of wind-induced oscillations of chimneys
H. Ruscheweyh, T. Galemann (Aachen, Germany) 55
Wind-induced vibrations of nonsymmetrical structures
M. Pirner, O. Fischer (Praha, Czech Republic) 63
Aerodynamic effects on a non-typical steel chimney 120 m high
R. Ciesielski, A. Flaga, J. Kawecki (Cracow, Poland) 77
Analysis of cross-wind response of steel chimneys with spoilers
M. Gaczek (Poznań, Poland), J. Kawecki (Cracow, Poland) 87
Low-speed wind gusts used for experimental evaluation of eigenfrequencies of tall reinforced concrete chimneys
R. Ciesielski, R. Oruba (Cracow, Poland) 97
Probabilistic and deterministic aspects of combinations of wind, thermal and dead loads on cooling towers
G. Bosak, A. Flaga (Cracow, Poland) 107
Wind-induced responses of an airport tower – efficiency of tuned liquid damper
Y. Tamura (Kanagawa, Japan), R. Kohsaka, O. Nakamura, K. Miyashita (Tokyo, Japan), V.J. Modi (Vancouver, Canada) 121
Model/full scale comparison of pressures on the roof of the TTU experimental building
H.W. Tieleman (Blacksburg, USA) 133
Design wind pressure coefficients for monoslope roofs: A time series approach
T. Stathopoulos, K. Suresh Kumar, A.R. Mohammadian (Montreal, Canada) 143
Wind-induced dynamic response and resultant load estimation for a flat long-span roof
Y. Uematsu, M. Yamada, A. Sasaki (Sendai, Japan) 155
Researches on wind effects on domes in Brazil
J. Blessmann (Porto Alegre, Brazil) 167
Induced vibrations of leeward ropes. A practical example
M. Studničková (Prague, Czech Republic) 179
Wind effects on the Normandie cable-stayed bridge: Comparison between full aeroelastic model tests and quasi-steady analytical approach
E. Conti, N. Cohen (Bagneux, France), G. Grillaud, J. Jacob (Nantes, France) 189
The Pont de Normandie during construction, aeroelastic modelling of behaviour
F.M. Livesey, G.L. Larose (Lyngby, Denmark) 203

Elsevier Science B.V.

Background and main features of the Romanian standard on wind action
H. Sandi (Bucharest, Romania) 217
Use of the provisions of the Romanian standard on wind action in the analysis of the dynamic response of two slender structures
M. Bontea, H. Sandi (Bucharest, Romania) 231
Experience with the new European Wind Load Code
H. Ruscheweyh (Aachen, Germany) 243
A visual technique for the evaluation of the pedestrian-level wind environment around buildings by using infrared thermography
M. Yamada, Y. Uematsu, R. Sasaki (Sendai, Japan) 261
Aerodynamic and thermal interaction of an element of a very rough surface with a turbulent boundary-layer flow
A.R.J. Borges, J.L. Carvalho (Monte de Caparica, Portugal) 273
New tools in wind engineering
B. Bienkiewicz (Fort Collins, USA) 279
Experimental and numerical analysis of vortex shedding from elongated rectangular cylinders at low Reynolds numbers $200–10^3$
Y. Nakamura, Y. Ohya, S. Ozono (Fukuoka, Japan), R. Nakayama (Kitakyushu, Japan) 301
Prediction by discrete vortex method of aerodynamic forces on smokestacks of various cross sections
K. Kushioka (Nagasaki, Japan), T. Ito (Tokyo, Japan), A. Honda (Nagasaki, Japan), K. Hirao (Hiroshima, Japan) 309
Numerical analysis of continuous models of structures in non-linear wind flow using the time-marching approach
F.A. Dul, J.A. Pietrucha (Warsaw, Poland) 321
Turbulence and separation induced pressure fluctuations on a finite circular cylinder – application of a linear unsteady strip theory
N. Hölscher, H.-J. Niemann (Bochum, Germany) 335
Vortex-excited vibrations and galloping of slender elements
H. Ruscheweyh, M. Hortmanns, C. Schnakenberg (Aachen, Germany) 347
Closed analytical solution for galloping aeroelastic self-oscillations
M.I. Kazakevich, A.G. Vasilenko (Dnepropetrovsk, Ukraine) 353
Modelling of aerodynamic loads on a downstream cylinder caused by bistable flow between two circular cylinders
E. Błazik-Borowa, A. Flaga (Lublin, Poland) 361
Wind action and temperature difference effects on the ventilation rate of a two-storey building communicating with the outside environment by a chimney
J.F.A. Dias Delgado, A.R. Janeiro Borges, J.M. Paixão Conde (Monte Caparica, Portugal) 371
A numerical simulation of the flow patterns inside a building due to wind action and heat release
J.F.A. Dias Delgado (Monte de Caparica, Portugal) 383
Outline of a novel method for the prediction of atmospheric pollution dispersal from road vehicles
C.J. Baker (Nottingham, UK) 395
Wind-tunnel tests of conveyer-belt housing structures
A.M. Goliger, J.L. Waldeck (Pretoria, South Africa) 405
Three-dimensional numerical calculation of the turbulent flow around a sharp-edged body by means of large-eddy-simulation
W. Frank (Karlsruhe, Germany) 415

Author index to volume 65 425
